Uses

To reduce tactile sensitivity of the penis in advance of intercourse as a means of delaying ejaculation in cases of over rapid or precipitant ejaculation.

Format and Ingredients

Spray containing:

Lidocaine 9.6% w/w,

Dosage

The quantity used and timing will vary with individual requirements, but the usual recommended dosage is 3 to 8 sprays to the head and shaft of the penis, 5 to 15 minutes before intercourse. The minimum effective quantity should always be used.
